EDUCATION

University of Colorado Boulder

B.S. Computer Science, Minor in Business | **Major GPA: 3.73 / 4.00**

Expected: May 2027

Boulder, CO

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, C, SQL, Swift, SwiftUI, HTML/CSS

ML & AI: PyTorch, scikit-learn, Hugging Face, SageMaker, LangChain/LangGraph, pgvector, NumPy, Pandas, SciPy

Frameworks & Tools: React, Next.js, FastAPI, Flask, Docker, Redis, AWS (Lambda, S3, DynamoDB), PostgreSQL

WORK EXPERIENCE

Software Engineer

Sep 2025 – Present

IM

Boulder, CO

- Built a real-time **AI dialogue system** with low-latency voice and **memory recall**, powering **5,000+ sessions**.
- Created **memory-extraction pipeline** and **insight dashboards** generating key personality and theme markers.
- Built **vector-memory RAG** and **domain-informed routing** for more grounded, context-aware dialogues.

Undergraduate Researcher

May 2025 - Present

University of Colorado Boulder – Genetic Logic Lab

Boulder, CO

- Lead full-stack dev on **SeqImprove**, an **AI-assisted synthetic-bio** curation tool adopted by **3 research labs**.
- Built a **multi-algorithm sequence hashing system** for sequence annotation, cutting generation time by **75%**.
- Optimized **sequence matching algorithms**, improving accuracy by **35%** and reducing runtime by **40%**.

Software Engineer Intern

Sep 2025 - Dec 2025

Sorcea Labs

Remote

- Built production **AWS inference pipeline** for **7M+ reviews** with Lambda, S3, SageMaker, and DynamoDB.
- Fine-tuned **DeBERTa-v3 NER** on **800K reviews** with local **GPU training** for entity and sentiment tasks.
- Delivered **personalized insights** driving **B2C/B2B recommendations** and long-term product analytics.

Software Engineer Intern

Jun 2025 - Sep 2025

Soaper

Remote

- Built **HIPAA-compliant AI** voice agent for emergency calls, cutting latency **45%** and providing **24/7** coverage.
- Automated **12 EMR actions** via voice-AI with **95%** action success, reducing clinician charting time by **50%**.
- Shipped secure **AWS S3** media upload flow with pre-signed URLs and encryption, cutting onboarding time **72%**.

PROJECTS

Sift – iMessage-Native AI Assistant for School & Life | [GitHub](#) | *FastAPI, LangChain, PostgreSQL, Redis, React*

- Built and launched a **personal AI assistant for students**, accessible via iMessage and a web dashboard, that manages tasks, schedules, notes, and calendars — serving **1,000+ students** with **50K+ messages/month**.
- Designed a **hierarchical agent system** delegating to **10 sub-agents** with **106 tools** across GCal, Gmail, Notion, Slack, and Canvas LMS — with a custom **iMessage relay** and Redis concurrency control.
- Engineered a **Canvas LMS sync pipeline** that parses unstructured syllabi, structures assignments/exams/grading schemes, and syncs grades — enabling automations like deadline reminders and missed-submission alerts.
- Implemented a **natural-language workflow engine** converting user instructions into executable DAG-based node graphs, powering morning briefings, email triage, and proactive check-ins with **entity graph memory**.

Timbrality – ML Music Recommender | [GitHub](#) | *PyTorch, scikit-learn, FastAPI, Redis/pgvector*

- Built **hybrid recommender** (CF, **two-tower NN**, **meta-learning**) for session-aware music discovery.
- Unified **200k+ tracks** from Spotify, Last.fm, and AOTY into one feature store with ratings, tags, & embeddings.
- Trained models on listening histories and ratings (**PyTorch, Hugging Face**), mixing collaborative and content.

LEADERSHIP EXPERIENCE

Software Engineer Team Lead

Aug 2025 - Present

Blueprint Boulder

Boulder, CO

- Lead **6-member** team developing booking and volunteer-scheduling software for **100+ special-needs families**.
- Manage client communication, turning feedback into sprint-ready **stories & specs** with **100%** on-time sprints.
