EDUCATION

University of Colorado Boulder

Expected: May 2027

B.S. Computer Science, Minor in Business | **Major GPA: 3.73 / 4.00**

Boulder, CO

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Swift, C++, C, SQL

AI/ML: PyTorch, scikit-learn, Hugging Face, LangChain/LangGraph, pgvector, NumPy, Pandas

Backend/Infra: FastAPI, Flask, PostgreSQL, Redis, Docker, AWS (Lambda, S3, DynamoDB), SageMaker

Frontend: React, Next.js, SwiftUI

WORK EXPERIENCE

Apple

May 2026 – Aug 2026

Software Engineer Intern

San Diego, CA

- Reduced end-to-end QA time from **~4 days** to **~2 hours** by building an autonomous AI pipeline using **Claude Agent SDK** to convert feature specs into passing, validated tests across **iOS, macOS, watchOS, visionOS**.
- Removed test execution as the primary QA bottleneck, parallelizing runs across **50+ devices** including multi-device family scenarios.
- Expanded automated coverage from **0%** to full validation for several Screen Time feature areas, enabling generation and review of **300+** tests per weekly cycle.
- Built a visual reporting layer with annotated screenshots and recordings, enabling engineers to verify test behavior without reading Swift test code; adopted by **8+ engineers** across **3 teams/apps** in production.

University of Colorado Boulder – Genetic Logic Lab

May 2025 – Present

Undergraduate Researcher

Boulder, CO

- Lead full-stack dev on **SeqImprove**, an **AI-assisted synthetic-bio** curation tool adopted by **3 research labs**.
- Designed and implemented a multi-algorithm sequence hashing system, reducing annotation time by **75%**.
- Engineered backend APIs and data models to support cross-platform integration of biological sequence workflows.

IM – AI Messaging Platform

Oct 2025 – Apr 2026

Founding Software Engineer

Boulder, CO

- Designed and shipped a real-time conversational backend handling **5,000+ sessions** with sub-second responses.
- Shipped ETL pipelines transforming unstructured conversation data into structured analytics datasets.
- Engineered retrieval and caching layers to persist conversational state and prevent data loss across user sessions.

Sorcea Labs

Sep 2025 – Dec 2025

Software Engineer Intern

Remote

- Built a serverless AWS pipeline processing **7M+ product reviews** with Lambda, S3, SageMaker & DynamoDB.
- Implemented CI/CD and Infrastructure-as-Code for automated deployments and improved production stability.
- Optimized AWS inference workflows, increasing throughput by **35%** while reducing latency and compute costs.

PROJECTS

Sift – Proactive AI assistant via iMessage | [GitHub](#) | *Python, FastAPI, PostgreSQL, Redis, React*

- Built and launched a proactive AI assistant managing tasks, schedules, and email for **100+ students**, processing **5k+ messages/month** in production.
- Architected a modular backend coordinating 10 custom services for scheduling, email triage, task planning, and Canvas synchronization.
- Engineered Redis-backed automation infrastructure for concurrent jobs, external API calls, durable state management, CI/CD, testing, and Sentry monitoring.

LEADERSHIP EXPERIENCE

Blueprint Boulder

Aug 2025 – Present

Software Engineer Team Lead

Boulder, CO

- Lead a **6-person** team building scheduling and booking software serving **100+ special-needs families**.
- Own client communication and sprint planning, translating feedback into specs with **100%** on-time delivery.
